Overview

Configure a mocked property to return a specified value

Mocking property hierarchies

- Manual
- Automatic
- Default mock value behavior

Configuring mock properties to track changes

- Single property
- Setting an initial value
- All properties

Summary

Configured a mocked property to return a specified value

- .Setup(...).Returns(300)

Setup mock property hierarchies

- Manual
- x => x.ScoreResult.ScoreValue.Score
- { DefaultValue = DefaultValue.Mock }

Configure mock properties to track changes

- .SetupProperty(...)
- .SetupProperty(..., [initial value])
- .SetupAllProperties()
