Overview

Configuring mock method return values

Argument matching with Moq

Mocking methods with out parameters

Mocking methods with ref parameters

Configuring mock methods to return null

Summary

```
mockIdentityVerifier.Setup(  
    x => x.Validate(...)).Returns(true);
```

Argument matching with Moq

- It.IsAny<string>()
- It.IsAny<int>()

Mocking methods with out parameters

Mocking methods with ref parameters

- It.Ref<IdentityVerificationStatus>.IsAny
- .Callback(...)

```
.Returns<string>(null)
```
